

FreeFlow Series

The more you use your EagleSun™ System, the more energy you save.

EagleSun™ Systems provide all your hot water needs for every season, even on cloudy days, by using clean, renewable solar energy. It is the only household appliance to pay for itself several times during its useful life. EagleSun™ Systems help save the environment as they save you money. Your energy bills will decline drastically and immediately as you enjoy the comfort of Solar Hot Water every day.

System Features:

- ◆ Attractive Skylight Collector Design
- ◆ 30+ Year Design Life
- ◆ 10 year limited collector warranty
- ◆ Electrical Backup
- ◆ Conforms to all Plumbing, Electrical and Solar Standards.
- ◆ Exceeds Energy Star Criteria and Delivers maximum credit toward Energy Efficiency Compliance.

FreeFlow Series

The Free Flow Series is a thermosyphon system. As a self contained solar water heating system, the Free Flow Systems have collector(s) positioned lower than the tank(s) and operate on the principle of natural convection. As the sun heats the water in the collector, it expands slightly and becomes lighter, causing the water to rise into the tank in the same way that a balloon rises in the air. The colder, heavier, water in the tank then sinks into the collector. These events create a continuous natural circulation.

Free Flow System Features:

- ◆ Thermosyphon systems are widely accepted throughout the world today. They are automatic, simple, and reliable.
- ◆ Thermosyphon Systems do not require a pump or control.
- ◆ There are no moving parts which allows for minimal, if any, maintenance concerns.
